Digibee

Enterprise integration. Redesigned for Financial Services Organizations.

Innovate at scale with modern integration architecture.

DIGIBEE INTEGRATION PLATFORM

According to Gartner, banks and investment firms were on track to spend $623B on technology products and services in 2022. The fastest-growing category? Software, increasing to $149B.

While financial services organizations have earmarked these investments for important innovation tracks, the ability of existing infrastructure to support these strategies is often overlooked.

The Digibee enterprise integration platform allows you to easily transform your enterprise so you can fast track innovation initiatives, leveraging three key pillars:

Cloud native

Resilience and high availability for all financial data flows.

Full lifecycle

Ecosystem-driven integrations built on top of existing capabilities.
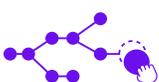

Low code

Expedited financial services IT projects to reduce costs and technical debt.

MODERN INTEGRATION ARCHITECTURE

Enterprise integration is a key ally in helping you achieve your critical business objectives.

Instead of investing time and resources to replace legacy infrastructure, Digibee helps you connect it to modern components, providing you with the technology and business agility you need to succeed.

TRUSTED BY CUSTOMERS

1.5B+
Transactions per month

250+
Enterprise customers

A GLOBAL RETAIL AND COMMERCIAL BANKING INSTITUTION INCREASES EFFICIENCY AND REDUCES OPERATING COSTS

Digibee integrated a complex currency distribution logistics network across a range of ATMs, stores, depots, and other partners. With process automation and end-to-end encryption, the bank can track the status of security transport operations in near real time. Read the customer's integration success story to learn more.

EXPERTS IN COMPLEX ENTERPRISE USE CASES

Digibee helps financial services organizations solve complex integration challenges across critical business systems while increasing productivity and profitability.

ALL SERVICES INCLUDED IN SUBSCRIPTION PACKAGE

The Digibee enterprise integration methodology ensures you retain ownership of all data and master integrations throughout the project. The knowledge and experiences gained are shared across your leadership and technology teams to ensure autonomy while driving innovation.

Digibee guides your team to employ modern integration capabilities throughout your IT organization. The journey starts with onboarding and ends with the creation of an integration empowerment team, all included in the subscription package.
